

CHATGPT & AI TOOLS

The dentist AI avatar setup

Clone your voice in ElevenLabs, build an avatar in HeyGen, and turn a script into a video without filming every time.

FILMING DAYS

Clone your voice. Create your avatar. Turn a script into a video without filming every time.

Two tools

ElevenLabs. Clone your voice.

HeyGen. Create your video avatar.

Use it for patient education, FAQs, reminders, and repeatable content.

Step 1 — Clone your voice

- 01 Record a clean sample of yourself speaking naturally.
- 02 Open ElevenLabs.
- 03 Go to Voices.
- 04 Click the + icon.
- 05 Select Instant Voice Clone.
- 06 Upload or record your voice sample.
- 07 Save the voice.

You can now paste in a script and generate audio in your cloned voice.

Tip. Use a quiet room. Speak normally. Avoid music, echo, or background noise.

Step 2 — Create your avatar

Now create the video version of you.

- 01 Open HeyGen.
- 02 Go to Avatars.
- 03 Click Clone a Real Person.
- 04 Follow HeyGen's recording instructions.
- 05 Record and submit the short sample it requests.
- 06 Let HeyGen build your avatar.

Step 3 — Add your voice

You have two options.

Simple. Use the voice clone created directly with your HeyGen avatar.

Advanced. Import your ElevenLabs voice inside HeyGen's voice settings.

HeyGen currently supports importing ElevenLabs voices through its third-party voice integration.

Step 4 — Make the video

- 01 Create a new video in HeyGen.
- 02 Select your avatar.
- 03 Select your cloned voice.
- 04 Paste in your script.
- 05 Generate the video.

THE SIMPLE WORKFLOW

- 01 Write script
- 02 Generate voice
- 03 Generate avatar video
- 04 Edit
- 05 Post

Want the scripts written for you? MOLAR builds the patient education library, you record the avatar once.

Where repetition is the problem

Do not replace every real video with an avatar. Use it where repetition is the problem.

GOOD USES

- Patient FAQs
- Treatment education
- Post-op reminders
- Simple social media education
- Multilingual versions of the same message
- Repeatable videos your team needs often

DO NOT DO THIS

- Do not clone someone else's face or voice without permission.
- Do not use an avatar to mislead patients into thinking a message was personally recorded when that distinction matters.
- Do not upload patient information or PHI into content-generation tools.

Close

We test and use AI tools like these to make patient education easier to create and easier to understand.

Follow @MOLAR for more dental marketing, AI, patient education, and practice growth.

Want MOLAR to build your avatar library?

Voice clone, avatar setup and the first month of patient education scripts, done with you.

Start here. molarai.studio

THE NEXT STEP

Stop making content. Start getting patients.

MOLAR is the content engine for dentistry — a patient-education library your practice can run every week without a camera crew, an agency retainer or a blank calendar.

MOLAR TV

01

A streaming library of patient-education video, built for the chair, the waiting room and your feed. Start the 14-day free trial and use it on a real patient this week.

Start the 14-day free trial

MOLAR Social

02

Your practice feed, produced for you. Scripts, edits, captions and a posting calendar that runs off the treatments you already sell. See a live demo of a real practice feed.
